

BP5 Function

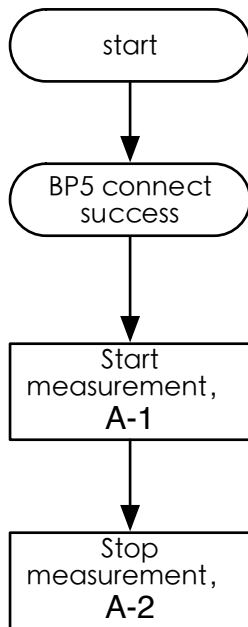

Note: Api call must be serial call, that is, after the end of a Api, you can call the next Api, otherwise it will appear Api function failure.

Note: The above 3 functions are parallel relations, there is no order.

BP5 Function A – Online Measurement Function

Note: 1. Api call must be serial call, that is, after the end of a Api, you can call the next Api, otherwise it will appear Api function failure.
2. In the BP5 measurement process, only to receive the stop measurement function (A-2), other Api failure.

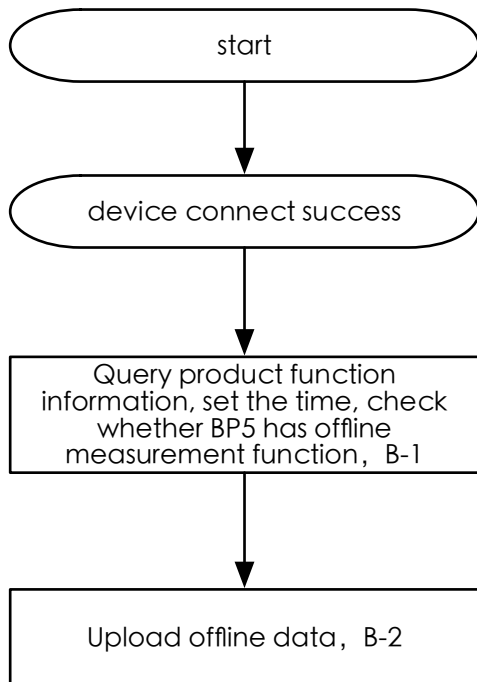

A-1: `commandStartMeasureWithUser: clientID:`

A-2: `stopBPMeasureErrorBlock: errorBlock:`

BP5 Function B – Upload Offline Data

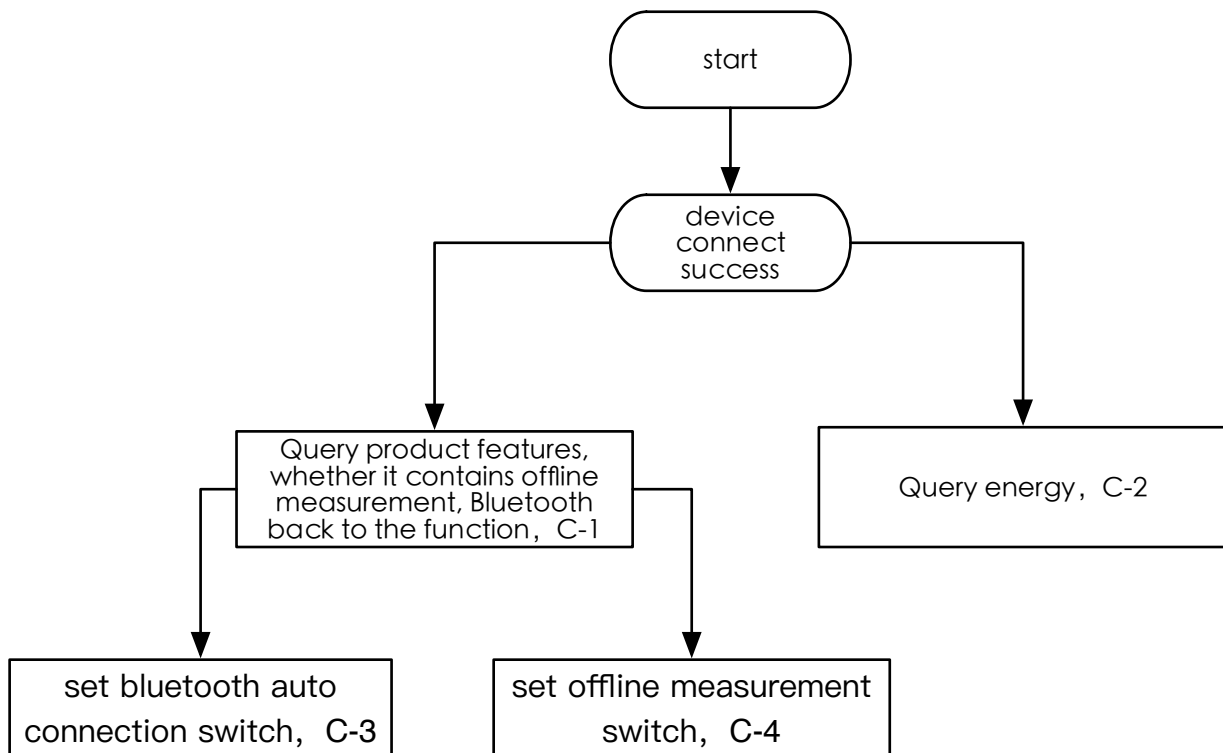

Note: BP5 (B-1) must be called before using the offline measurement function of the Api, otherwise the offline data time may be wrong.

B-1: `commandFunction: errorBlock:`

B-2: `commandBatchUpload: progress:`

BP5 Function C –Querying and Setting Function

C-1: commandFunction: errorBlock:

C-2: commandEnergy: errorBlock:

C-3: commandSetBlueConnect: respond:

C-4: commandSetOffline: errorBlock:
